FirstGroup
Innovation at Stations
Stuart Parker, Group Property Director
14th June 2018
Introduction

- **Innovation** is key to long-term strategic management and stewardship of the station portfolio
- Digital technology experience of Commercial Real Estate and Smart Cities
- FirstGroup approach and lessons for the industry
- Video of a project we are supporting
Current Approach

- Smart technology is being adopted but often in ‘silo’s’
- Proprietary legacy systems
- Aim should be to create intelligence
Internet of Things Technology

- Cost of IoT technology is falling
- Real Estate phased migration
- Smart Cities use connected lights as platform for other connecting other assets/sensors
- Interoperability, safety and security requires open standards and protocols
New franchises are investing in LED – opportunity to introduce IoT technology

- We have developed this approach at GWR and are looking to adopt in new franchises
- If we don’t specify this properly we will lock out IoT and innovation for 10+ years
