Upcoming Events

Programme Update

Here’s a positive monthly update on the Rail Data Marketplace and its significant improvements.

You are the heart of our programme! Let us know your thoughts and ideas at our upcoming event in London, TBA. We look forward to seeing you there.

Programme Update

As we look towards the third quarter of 2022, we are making some significant changes to the Rail Data Marketplace.

1. **New Data Governance Model**
   - We are introducing a new data governance model to ensure that our data is of the highest quality.
   - This will involve the establishment of a Data Governance Board, which will be responsible for overseeing the development and maintenance of our data standards.
   - We will also be implementing a rigorous data quality assurance process to ensure that all data is accurate and reliable.

2. **New Licence Update**
   - We are revamping our Licence Update process to make it more accessible and user-friendly.
   - This will involve the creation of a new Licence Update portal, which will allow users to easily access and download the latest licences.
   - We will also be implementing a new licence verification system to ensure that all licences are valid and up-to-date.

3. **New Data Sources**
   - We are expanding our data sources to include more industry partners and stakeholders.
   - This will involve the integration of new data sources into our platform, which will provide users with access to a wider range of data.
   - We will also be implementing a new data sources management system to ensure that all data sources are properly documented and maintained.

4. **New Data Management**
   - We are introducing a new data management framework to ensure that our data is properly structured and organized.
   - This will involve the creation of a new data management library, which will provide users with access to a wide range of data management tools.
   - We will also be implementing a new data management training programme to ensure that all users are properly trained in the use of our data management tools.

5. **New Data Security**
   - We are strengthening our data security measures to ensure that our data is protected from unauthorized access.
   - This will involve the implementation of a new security policy, which will include a range of measures such as data encryption, access controls, and audit trails.
   - We will also be implementing a new data security training programme to ensure that all users are properly trained in the use of our data security tools.

6. **New Data Quality**
   - We are improving our data quality standards to ensure that our data is of the highest quality.
   - This will involve the implementation of a new data quality assurance process, which will include regular data quality audits and inspections.
   - We will also be implementing a new data quality training programme to ensure that all users are properly trained in the use of our data quality tools.

7. **New Licensing & Monetisation**
   - We are introducing a new licensing and monetisation model to ensure that our data is properly monetized.
   - This will involve the implementation of a new licensing model, which will include a range of licensing options such as pay-per-use, subscription-based, and data-as-a-service.
   - We will also be implementing a new licensing and monetisation training programme to ensure that all users are properly trained in the use of our licensing and monetisation tools.

8. **New Covisint of Licence Update**
   - We are introducing a new Covisint of Licence Update to ensure that our data is properly integrated with other platforms.
   - This will involve the implementation of a new Covisint integration framework, which will provide users with access to a wide range of Covisint integration tools.
   - We will also be implementing a new Covisint integration training programme to ensure that all users are properly trained in the use of our Covisint integration tools.

9. **New Dashboard**
   - We are introducing a new dashboard to provide users with real-time access to their data.
   - This will involve the implementation of a new dashboard framework, which will provide users with access to a wide range of dashboard tools.
   - We will also be implementing a new dashboard training programme to ensure that all users are properly trained in the use of our dashboard tools.

10. **New Webinar**
    - We are launching a new webinar series to provide users with access to expert insights and best practices.
    - This will involve the implementation of a new webinar framework, which will provide users with access to a wide range of webinar tools.
    - We will also be implementing a new webinar training programme to ensure that all users are properly trained in the use of our webinar tools.

11. **New Newsletter**
    - We are launching a new newsletter to provide users with regular updates on our latest developments.
    - This will involve the implementation of a new newsletter framework, which will provide users with access to a wide range of newsletter tools.
    - We will also be implementing a new newsletter training programme to ensure that all users are properly trained in the use of our newsletter tools.

12. **New API**
    - We are launching a new API to provide users with access to our data through a variety of programming languages.
    - This will involve the implementation of a new API framework, which will provide users with access to a wide range of API tools.
    - We will also be implementing a new API training programme to ensure that all users are properly trained in the use of our API tools.

Data sources

The following is a list of our current data sources:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

Data management

The following is a list of our current data management tools:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

Data Quality

The following is a list of our current data quality tools:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

Data Security

The following is a list of our current data security tools:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

Licensing & Monetisation

The following is a list of our current licensing and monetisation tools:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

Covisint of Licence Update

The following is a list of our current Covisint of Licence Update tools:

1. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

2. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

3. **Cambridge**
   - Cambridge University
   - Data provided by Cambridge University
   - Access to this data is restricted to academic institutions.

We hope that these updates will be of interest to you and that they will help to improve the quality and availability of our data.

If you have any questions or comments, please feel free to contact us at data@raildeliverygroup.com.

Thank you for your continued support and we look forward to working with you in the future.
