Competence of Station Incident Officers

RDG-OPS-GN-017

Issue 5 – July 2026

About this document

Explanatory note

The Rail Delivery Group is not a regulatory body and compliance with Guidance Notes or Approved Codes of Practice is not mandatory; they reflect good practice and are advisory only. Users are recommended to evaluate the guidance against their own arrangements in a structured and systematic way, noting that parts of the guidance may not be appropriate to their operations. It is recommended that this process of evaluation and any subsequent decision to adopt (or not adopt) elements of the guidance should be documented. Compliance with any or all of the contents herein, is entirely at an organisation's own discretion.

Other Guidance Notes or Approved Codes of Practice are available on the [Rail Delivery Group \(RDG\) website](#).

Executive summary

This Guidance Note sets out recommended criteria for ensuring the competence of persons nominated to act as Station Incident Officers by railway undertakings in accordance with Railway Group Industry Standard RIS-3118-TOM.

Issue record

Issues 1 and 2 of this document were published as ATOC/GN017 and Issue 3 as RDG-GN017 respectively.

Issue	Date	Comments
1	March 2013	Original version* as an ATOC document (* to replace Good Practice Guide ATOC/GPG010 on same subject.)
2	July 2014	Periodic review and also to mirror changes made to ATOC/GN016 – Competence of Train Liaison Officers (TOLOs)
3	February 2017	Periodic review and also reformatted as an RDG document
4	July 2022	Following periodic review. Reformatted to comply with latest RDG template.
5	July 2026	Following periodic review.

This document is reviewed on a regular 3 year cycle.

1 Purpose and scope

1.1 Purpose

This Guidance Note sets out the minimum recommended criteria intended to ensure the competence of Station Incident Officers where appointed by a railway undertaking, acting as a Station Facility Owner, in compliance with Rail Industry Standard RIS-3118-TOM - Incident Response Planning and Management.

Station Incident Officers are intended to be proficient to manage incidents in the station environment but not those involving train movements. Proficiency as a Station Incident Officer does not enable the holder to manage incidents affecting the operational railway infrastructure (where additional training to Rail Incident Officer (RIO) or Train Operator Liaison Officer (TOLO) standards is required).

1.2 Scope

This guidance applies to persons who may be required to act as a railway undertaking appointed Station Incident Officer and those responsible for ensuring their competence.

Network Rail has in place its own arrangements for appointing, training, ensuring the competence of and deploying Station Incident Officers at its managed stations.

2 Definitions

The definitions documented in Rail Industry Standard RIS-3118-TOM apply. Other key definitions are specified below.

Term	Definition in the context of this document
Emergency services	The statutory fire, police (including British Transport Police), ambulance or coastguard services in whose areas an incident occurs.
Joint Emergency Services Interoperability Principles (JESIP)	The guiding principles for multiagency joint working during an incident where the emergency services and other responder organisations are involved.
Local Resilience Forum (LRF)	Within England and Wales, group/process for bringing together all the Category 1 and 2 responders within a police force area for the purpose of facilitating co-operation in fulfilment of their duties under the Civil Contingencies Act. Local Resilience Partnerships (LRPs) perform a similar role in Scotland. LRFs are potentially a useful source of support when responding to more significant incidents and would likely stand up their own incident response arrangements in the event of a Major Incident being declared.
Major Incident	Any emergency event or situation that requires the implementation of special arrangements by one or more of the emergency responder agencies. <i>N.B. these comprise all Category one and two responders as defined in the Civil Contingencies Act (2004)</i>
Owning Operator(s)	The railway undertaking(s) whose train(s) is/are involved in an accident or incident.
Passenger Information During Disruption (PIDD)	Passenger information needs increase with disruption – PIDD is the phrase used to cover all aspects of these needs.

Primary Support Operator	The railway undertaking which has previously been agreed as the best placed (geographically) to provide initial assistance to the Owning Operator in meeting the latter's responsibilities for providing both an operational and humanitarian assistance response. The definitive list of agreed Primary Support Operators by route section is provided as Appendix A to RDG-OPS-ACOP-004: Incident Response Duties of Primary Support Operators.
Rail Incident Officer (RIO)	The nominated and certificated person charged with the roles of i) on-site command and control of all rail related organisations and their support; ii) co-ordination of all on-site rail activities; and iii) overall responsibility for the safety of people in respect of GB mainline railway hazards, at the whole incident site. Appointed by Network Rail, this is a Tactical level role.
Station Facility Owner (SFO)	An organisation, e.g. a railway undertaking or Network Rail, responsible for station management and operations.
Station Incident Officer	The nominated and certified person charged with the role of on-site command and control of all rail-related organisations and their support for an incident involving a station. Appointed by the Station Facility Owner – which may be either Network Rail or a railway undertaking – to take responsibility for managing the operation of a station in the event of an incident at that station. This is an Operational level role. The Station Incident Officer will call together representatives of all rail-related organisations at the station and provide accommodation, facilities and staff as agreed to operate this Code. In some circumstances the RIO may assume this role. For an incident that affects both the route and a station, the RIO assumes command of the incident and the Station Incident Officer reports to that RIO. <i>Note: Station Incident Officer should not be abbreviated to SIO to avoid confusion with Senior Incident Officer (as used by Network Rail) and Senior Investigating Officer (as used by the police).</i>
Support Operator	Railway undertakings or any other organisations, including Network Rail Managed Stations, who provide staff to work under the direction of the Owning Operator or Primary Support Operator in support of their response to an incident. One such Support Operator is designated as Primary Support Operator within each geographical area.
Train Operator Liaison Officer (TOLO)	Person appointed by a railway undertaking as the lead representative of all those railway undertakings affected by an incident. The TOLO will report to and liaise with the RIO on-site (and could act as RIO until such time as a Network Rail appointed RIO is available), or to the Station incident Officer for station related incidents. This is an Operational level role.

3 Appointment, training & competency of Station Incident Officers

3.1 Nomination of Station Incident Officer

The appointment and role of the Station Incident Officer are set out in RIS-3118-TOM.

Nomination for assessment and certification as a Station Incident Officer should be based on an underpinning qualification of:

- i. Rules and Regulations: An awareness of the requirements of the Railway Group Modular Rule Book as they may apply in a station emergency.
- ii. Managerial experience: Managerial/supervisory experience in station operations, leadership, initiative skills and the ability to make critical decisions.
- iii. Awareness and understanding of the emergency response procedures as far as these are applicable to locations where they will undertake the role of Station Incident Officer.

3.2 Preparation for Station Incident Officer responsibilities

Indicative Station Incident Officer activities and responsibilities are set out in RIS-3118-TOM. Persons being nominated to act as a Station Incident Officer should undertake training for the role prior to initial assessment of competence and later to maintain the currency of their competence.

Simulation of the role is recommended to maintain and enhance competency through participation in tabletop and/or live emergency exercises.

3.3 Competence assessment

Appendix A of this Guidance Note contains the recommended standards of competence, as developed by railway undertakings and validated by the Railway Group, for providing a systematic and consistent approach for the generic training of Station Incident Officer responsibilities.

It is recommended that recertification of Station Incident Officers is undertaken every three years. This may be undertaken as part of the candidate's periodic operating rules assessment where required. Opportunities to assess practical competence are not always readily available – evidence should be sought from participation in live and/or tabletop exercises, during which station incident officers should maintain a logbook of their actions.

Guidance on the planning and delivery of Station Incident Officer training courses is provided in Appendix C.

Participation in incidents may also be used to demonstrate competence by assessing records compiled during and after the incident.

4 Record keeping

Railway undertakings should maintain records of each employee certificated as competent to undertake the role of Station Incident Officer, and of each occasion they are required to do so.

Such records should be used to identify the need for refresher training where individuals have not been called upon to perform the role for a prolonged period of time.

5 Infrastructure manager

5.1 Roles and responsibilities of the Infrastructure Manager

The definition of infrastructure manager is contained within Rail Industry Standard RIS-3118-TOM.

Within the content of this Guidance Note, it is likely that Network Rail will assume responsibility for the overall incident response in many cases, as it is likely that the running lines will be affected. Where this applies, or where a Major Incident is declared by the emergency services which affects or has the potential to affect the GB mainline railway, Network Rail will appoint a RIO¹ and the Station Incident Officer will report to them. However, a RIO would not normally be appointed for an incident at a station that does not directly affect rail movements.

Where Network Rail is the SFO, they will assume full responsibility for the training, competency and appointment of Station Incident Officers.

Where the SFO is not Network Rail, responsibility for the training, competency and appointment of Station Incident Officers will rest wholly with the relevant railway undertaking.

5.2 Supporting the Infrastructure Manager

At Network Rail managed locations, it is recognised that there may also be railway undertaking staff who would benefit from having an awareness of the Network Rail Station Incident Officer role in the wider station incident response in order to provide support for it. However, where railway undertaking staff based at a Network Rail managed location are nominated to attend Station Incident Officer training, it should be made clear that they are receiving training in order to support and not to fulfil the role of the Network Rail Station Incident Officer.

¹ A Rail Incident Commander (RIC) may additionally be appointed by Network Rail when either a Major Incident is declared, or it is considered that the scale of the incident warrants a strategic level of command. If appointed, the RIC has overall responsibility for management of the incident and the Station Incident Officer will report to them.

Appendix A - Recommended competence standards

OVERVIEW

Note: All references to 'railway undertaking' refer to it in the role of Station Facility Owner

<i>Units of Competence</i>	<i>Elements</i>
1. <i>Response to Notification</i>	1.1 <i>Establishing Clear Understanding</i> 1.2 <i>Implementation of Command and Control</i> 1.3 <i>Immediate Response of Railway Undertaking Implemented</i> <i>Appendix: Resource Allocation – Major Incidents</i>
2. <i>Incident Site Management</i>	2.1 <i>Liaison with Interfacing Agencies</i>
3. <i>Confirm Safe Conditions for Implementation of Restoration of Normal Working</i>	3.1 <i>Assembly Point, Roll Call, including Security and Isolation of RV Point and Crowd Safety Management</i> 3.2 <i>Safety & Support of Persons</i> 3.3 <i>Preservation of Evidence</i>
4. <i>Planning for Restoration of Normal Services</i>	4.1 <i>Participation in Multi Agency Working</i> 4.2 <i>Employee Welfare</i>
5. <i>Learning from Events</i>	5.1 <i>Debrief/Review</i>

RECOMMENDED COMPETENCE STANDARDS - UNIT 1, ELEMENT 1.1

Unit 1:	Response to Notification
Element 1.1:	Establishing Clear Understanding
Performance Criteria	(a) Confirmation of relevant details (b) Preparation to attend (c) Personal safety (d) Maintaining a documented record
Scope	Relevant details are: <i>M – Major Incident – has this been declared (and, if so, by whom)?</i> <i>E – Exact Location</i> <i>T – Type of Incident</i> <i>H – Hazards – identification of any known/suspected to be present</i> <i>A – Access and egress – identification of suitable access points</i> <i>N – Number of casualties</i> <i>E – Emergency services – have they been summoned to/are they at the scene?</i> Also: - Identification of specific trains involved (if any) – is another railway undertaking involved? - Has the infrastructure manager been notified/is attending? Maintaining a documented record must involve: - Use of a specific logbook or other written means to record key decisions and the basis for these (including information known at the time of that decision), the time of any actions carried out and any other information relevant to the response to, recovery from and investigation of the incident
Essential Underpinning Knowledge	- Understanding the railway command structure - Railway undertaking emergency response procedures and role of senior management team - Communication arrangements with relevant control centre(s) - Railway undertaking competency standards - Structure of emergency services and local authority response - Understanding of the JESIP principles for multiagency incidents

RECOMMENDED COMPETENCE STANDARDS - UNIT 1, ELEMENT 1.2

Unit 1:	Response to Notification
Element 1.2:	Implementation of Command and Control
Performance Criteria	(a) Understanding of command and control structure (b) Safety and responsibilities of command and control (c) Understanding the need for gaining and maintaining situational awareness (d) Understanding the need for making structured decisions and the importance of recording supporting rationale
Scope	Command and control is: - Strategic (Gold) Management: - Development and implementation of strategies for mitigating the consequences of the incident - Tactical (Silver) Management: - Tactical planning, implementation and management of practical activities at the incident site in order to maintain safety and facilitate the requirements for rescue and recovery - Operational (Bronze) Management: - Practical application and delivery of activities planned at tactical (Silver) level Structure relates to: - Interface and co-ordination arrangements with the infrastructure manager - Location of command levels (such as Strategic Level at control centre/Major Incident Room) - Railway undertaking managerial appointments to each level of command - Level of seniority required for seriousness of incident
Essential Underpinning Knowledge	- Railway undertaking managerial arrangements for command and control notification, mobilisation and deployment - Senior management roles - Interfacing command and control arrangements with the infrastructure manager and other railway undertakings - Knowledge of the JESIP principles, including the Joint Decision Model (JDM).

RECOMMENDED COMPETENCE STANDARDS - UNIT 1, ELEMENT 1.3

Unit 1:	Response to Notification
Element 1.3:	Immediate Response of Railway Undertaking Implemented
Performance Criteria	(a) Ability to identify hazard and potential risk to the personal safety of others and self and how to communicate those risks effectively (b) Implement measures to mitigate the immediate consequences. (c) Determine and ensure deployment of railway undertaking resources (d) Getting and maintaining situational awareness so risks and threats continue to be identified, assessed and controlled
Scope	The Station Incident Officer must be able to identify the immediate hazards associated with the incident, the risk they pose to members of the public and rail employees, including themselves. This should also include the potential wider implications of the incident on other business operations (the 'ripple' effect). This includes the need to work with other responder agencies to establish a shared understanding of the risks and threats and feeding that into the JESIP Joint Decision Model (JDM). Immediate actions required to mitigate against the possible consequences may include: - Removal of persons to an immediate place of safety - Cordoning off areas of the premises which are considered to be dangerous or expose persons to potential trauma - Full or partial evacuation of the premises should it be necessary in the circumstances - Restricting or controlling access to the premises Deployment of Railway Undertaking personnel may include: - To assist Station Incident Officer at incident site, including any requirement for station evacuation and/or controlling access - To provide customer support and assistance - Awareness of company media response responsibilities Railway undertaking resources may include: - Person to record events (i.e. note taker) - Operations personnel - Customer support personnel - On-call personnel - Media relations personnel - Incident Care Team members
Essential Underpinning Knowledge	- An understanding of hazard and risk and the principles of control measures needed to mitigate - Railway undertaking arrangements for emergency notification of key personnel - Resource availability and role of railway undertaking/SFO Strategic Management Team (e.g. Crisis Management Team/Service Disruption Team, etc.) - Appreciation of the role of the Incident Care Team and, in the event of an incident at the station, the need to pass on to it information essential to the humanitarian response, i.e. details of the number and nature of casualties, details of reception centres, receiving hospitals, etc. - Requirements to apply appropriate PIDD processes - Knowledge of the JESIP principles

APPENDIX TO UNIT 1 – RESOURCE ALLOCATION FOR A MAJOR INCIDENT

Performance Criteria	(a) <i>Allocate appropriately qualified people to positions.</i> (b) <i>Agree and ensure deployment of local resources.</i>
Scope	<i>Railway undertaking resources may include:</i> - <i>As Element 1.2 plus</i> - <i>Local access to finance, i.e. awareness of company processes to obtain emergency finance</i> <i>Deployment of railway undertaking personnel may include:</i> - <i>As Element 1.2</i>
Essential Underpinning Knowledge	- <i>Railway undertaking arrangements for emergency notification of key personnel</i> - <i>Resource availability and role of strategic management</i> - <i>Primary Support Operator role</i> - <i>Arrangements for Major Incidents</i> - <i>Understanding of the JESIP principles</i> - <i>Awareness of where any additional response equipment (critical incident kits/stretchers etc./evacuation chairs etc.) is kept</i>

RECOMMENDED COMPETENCE STANDARDS - UNIT 2, ELEMENT 2.1

Unit 2:	Incident Site Management
Element 2.1:	Liaison with Interfacing Agencies
Performance Criteria	(a) Identification of responding agencies (b) Understanding of agency roles (c) Understanding of the role of Local Resilience Forums (LRFs) (d) Awareness of the JESIP principles
Scope	Interfacing Agencies may include: - Network Rail or other infrastructure manager - Other train operators - Other transport providers (such as London Underground, light rail including tram operators) - British Transport Police - Civil police - Fire and rescue service - Ambulance service - Local authorities - Office of Rail Regulation (ORR) - Rail Accident Investigation Branch (RAIB) - Voluntary sector organisations such as Mountain Rescue and Lowland Rescue - LRFs – noting that many of the above agencies come together through LRFs Agency roles may include: - Rail industry response management and co-ordination - Primary Support Operator, Support Operator and Owning Operator roles and responsibilities - Site safety - Co-ordination of emergency services - Implementation of cordons - Security of site - Firefighting, rescue and recovery - Medical treatment - Recovery of bodies - Recovery of personal property - Preservation of evidence - Provision of reception centres
Essential Underpinning Knowledge	- Generic roles and responsibilities of external agency personnel - Existence, purpose and capabilities of LRFs in respect of incident response - Incident site command and control arrangements - Interface protocol at the incident site – identification of lead agency - Basic understanding of the JESIP principles)

RECOMMENDED COMPETENCE STANDARDS - UNIT 3, ELEMENT 3.1

Unit 3:	Confirm Safe Conditions for Implementation of Restoration of Normal Working
Element 3.1:	Assembly Point, Roll Call, including Security and Isolation of RV Point and Crowd Safety Management
Performance Criteria	(a) Confirm emergency procedures have been carried out (refer to Unit 1 Element 1.3) (b) Establish station is secure, and all persons accounted for (c) Liaise with British Transport Police (BTP), emergency services and Network Rail (d) Principles of crowd control (safe evacuation and resumption)
Scope	Confirmation of emergency procedures is: - Establishing if procedures have been carried out - Assessing what needs to be done - Assessing potential resource needs Emergency procedures include: - Station evacuation - Event management - Major injury - Security threat - Weather - Power outages - Flood Securing of stations is: - Isolating utilities if required - Closing all access routes - Manning access, with controlled entry (in conjunction with BTP, Emergency Services, etc.) - Stopping trains from calling Liaison with emergency services may include: - Accountability of persons - Establishment of central command point - Confirmation of site safety arrangements including local hazards - Mutual identification of RIO and TOLO (if attending) and reaching an understanding of each other's roles at the incident - Safe evacuation (and restoration) procedures - Availability of escape routes and alternatives - Arrangements for vulnerable people - Resumption processes (i.e. consultation with other key agencies on and off site) - Ensuring staff are back in position and services are ready
Essential Underpinning Knowledge	- Broad understanding of rail incident management - Understanding of local hazards and procedures - Location of local emergency plans - Crowd management - Event management

RECOMMENDED COMPETENCE STANDARDS - UNIT 3, ELEMENT 3.2

Unit 3:	Confirm Safe Conditions for Implementation of Restoration of Normal Working
Element 3.2:	Safety & Support of Persons
Performance Criteria	(a) <i>Jointly plan and agree arrangements with emergency services, Network Rail and local authority</i> (b) <i>Communication of arrangements to staff, public and tenants</i> (c) <i>Ensure railway undertaking off-site customer support implemented and provided</i>
Scope	<i>Agreement of arrangements may include:</i> - <i>The need to evacuate from station</i> - <i>Identification of emergency egress points to facilitate evacuation</i> - <i>Allocation of staff to appropriate roles/locations</i> - <i>Use of emergency equipment where necessary</i> - <i>Identification of assembly point(s) and holding area for onward transfer (if appropriate)</i> <i>Communication of arrangements to passengers and tenants may include:</i> - <i>Use of display screens if operable</i> - <i>Use of PA systems if operable</i> - <i>Use of portable public address equipment</i> - <i>Face to face instruction and directions</i> - <i>Providing reassurance</i> - <i>Utilising other on-site rail personnel to assist and escort</i> - <i>Provision of posters</i> - <i>Intranet/internet web sites</i> - <i>Social media</i> <i>Ensuring railway undertaking off-site customer support implemented and provided may include:</i> - <i>Notification to railway undertaking control of relevant safe assembly points/holding area(s)</i> - <i>Notification to Incident Care Team of details of the number and nature of casualties, details of reception centres, receiving hospitals, etc.</i>
Essential Underpinning Knowledge	- <i>Local communication equipment</i> - <i>Local authority/voluntary services resources</i> - <i>Railway undertaking arrangements for the provision of customer support</i> - <i>Appreciation of the role of the Incident Care Team</i> - <i>Requirements to apply appropriate PIDD processes</i>

RECOMMENDED COMPETENCE STANDARDS - UNIT 3, ELEMENT 3.3

Unit 3:	Confirm Safe Conditions for Implementation of Restoration of Normal Working
Element 3.3:	Preservation of Evidence
Performance Criteria	(a) Evidence is not interfered with or removed without permission from authorised personnel (b) Protocol of collection (c) Method of collection and continuity of evidence
Scope	Evidence is: - Perishable (ice, snow, liquids) - Non-perishable Authorised Personnel are: - RAIB representative or appointed agent (if present) - RIO - TOLO - Station Incident Officer - Police (British Transport and Civil) Incident Officer - ORR representative Protocol should include: - Reaching an understanding with interfacing agencies in respect of preserving and gathering evidence without interfering with rescue and recovery operations to save life - Agreement to gather perishable evidence as soon as reasonably practicable Method of collection includes: - 'For Cause' testing for drugs and alcohol of personnel involved - Photographing (to include the understanding of using a film camera as opposed to digital) - Sketching - Written notes – originals MUST be retained - Telephone & radio tapes or downloads - CCTV footage, specifically station monitoring systems but also on train systems including forward facing driving cab cameras Continuity of evidence achieved by: - Collecting evidence in the presence of/under supervision by the RIO and Civil/BT Police/ORR/RAIB - Development of camera film by Civil/BT Police - Countersigning of written evidence such as notes and sketches - The sealing of recorded evidence such as CCTV media
Essential Underpinning Knowledge	- Accident & incident investigation procedures - 'For Cause' drugs and alcohol screening procedures

RECOMMENDED COMPETENCE STANDARDS - UNIT 4, ELEMENT 4.1

Unit 4:	Planning for Restoration of Normal Working
Element 4.1:	Participation in Multi Agency Working
Performance Criteria	(a) Provision of relevant expertise and advice (b) Agreement of joint action plans (c) Co-ordination and Management of Railway Undertaking responses
Scope	Expertise may include: - Identification of specific risks associated with the restoration of services (especially platform/train loadings/train-platform compatibility and availability) - Advice on crowd management - Advice on alternative means of transport - Effect of recovery operations on remainder of route and other stations Input into joint action plans may include: - Availability, co-ordination and deployment of railway undertaking resources working with BTP, etc. - Management of railway undertaking resources for interim working arrangements Management of railway undertaking responses may include: - Ensuring resources are available to relieve on-site railway undertaking staff when necessary - Provision of contingency train service - Provision of alternative transport arrangements - Provision of customer support to uninjured, delayed and displaced passengers - Provision of mutual aid to other operators
Essential Underpinning Knowledge	- Network Rail and railway undertaking command structures and their implementation - Roles and responsibilities of the representatives of other responding organisations - Railway undertaking corporate strategies for customer service - Requirements to apply appropriate PIDD processes - Understanding of the JESIP principles)

RECOMMENDED COMPETENCE STANDARDS - UNIT 4, ELEMENT 4.2

Unit 4:	Planning for Restoration of Normal Working
Element 4.2:	Employee Welfare
Performance Criteria	(a) Ensuring welfare of employees. (b) Ensuring self-welfare. (c) Relief and handover of duties (d) Offsite and post incident support for self.
Scope	Welfare of employees may include: - Identification of need and provision of assistance in cases of trauma - Arrangement of accompanied transportation from site to home/depot/station, etc. - Advice to relatives of employees (in conjunction with Police and railway undertaking Incident Care Team where appropriate) - Arrangements to provide relevant post-incident support Welfare of self should include: - Recognising limitations - Acknowledgement of own fatigue and stress - Actively seeking support within railway undertaking chain of care and welfare processes Relief and handover of duties should include: - Making arrangements with control office for a relief Station Incident Officer to be provided within a reasonable timescale - Undertaking handover with relief Station Incident Officer - Consideration of getting home in respect of potential fatigue or mental strain (taxi instead of driving own or company road vehicle for example)
Essential Underpinning Knowledge	- Railway undertaking procedures for providing employee chain of care and support - Understanding of local arrangements for TRiM (Trauma Risk Management) and EAPs (Employee Assistance Programmes)
Additional Considerations	Line managers of personnel undertaking Station Incident Officer duties must identify appropriate actions for ensuring the welfare of those individuals and ensure these are undertaken following their involvement in the management of an incident, particularly if the circumstances of the event have the potential for inducing trauma or emotional upset.

RECOMMENDED COMPETENCE STANDARDS - UNIT 5, ELEMENT 5.1

Unit 5:	Learning from events
Element 5.1:	Debrief/Review
Performance Criteria	(a) Debriefs/reviews are held jointly with appropriate parties. (b) Response Plans are reviewed after debrief and, if necessary, arranged to be revised and reissued
Scope	Debrief may involve: - Local staff, including other members of the Railway Group, e.g. Network Rail, other railway undertakings, etc. - Those with specialist knowledge such as the railway undertaking management responsible for emergency planning, fire safety and security for example - External agencies, such as the emergency services Debrief may include: - Identification and sharing of good practice - Identifying weaknesses in planning or response that may need to be addressed - Sharing results openly without blame - Staff briefing or training needs Review will include: - Examination of existing plans against events, response and consequences - Determination of revisions to the plan and the arrangements for reissue
Essential Underpinning Knowledge	- Appropriate plans (local and cross-company) - Requirements of Safety Certificate/Safety Authorisation - Debriefing processes and techniques (if leading the debrief)

Appendix B - Supplementary requirements for Major Incidents

Introduction:

Major rail incidents will require on site tactical decision-making at a level not normally expected of railway undertaking personnel trained and who hold a certificate to undertake the role of the Station Incident Officer or TOLO on a first response basis.

These supplementary requirements should be considered by railway undertakings in planning and implementing their chain of command for such occurrences to include the provision of a competent senior manager to take over the role of Station Incident Officer from the initially appointed person and the subsequent redeployment of on-site management personnel.

Element	Commitment and co-ordination of railway undertaking resources
Criteria	Senior managers undertaking the role of Station Incident Officer at the site of a major rail accident must be able to: - Influence the commitment of the necessary financial and personnel resources of railway undertaking organisation(s), their suppliers and agents to effect full recovery - Maintain joint planning, communication and media briefing arrangements with the RIO and emergency services - Assist with the requirements of company insurance assessors through the Network Rail On-Site lead role - Maintain effective communication with railway undertaking strategic decision makers to ensure an appropriate corporate response and consistent media policy - If present at the incident location, they are required to have full Station Incident Officer competency
Essential Underpinning Knowledge	- Robust understanding of command and control structures established for Major Incidents - Contents of relevant Railway Group Standards and railway undertaking emergency plan - Experience of operational management at senior level - Appreciation of the role of the Incident Care Team and the need to pass on to them information essential to the humanitarian response, i.e. details of the number and nature of casualties, details of reception centres, receiving hospitals, etc. - Protocols for communicating with senior managers/directors within own company and other organisations - Requirements to apply appropriate PIDD processes - Understanding of the JESIP principles) - Appreciation of the existence, purpose and capabilities of Local Resilience Forums (LRFs), particularly in respect of incident response.

Appendix C – Guidance on training considerations and delivery

Introduction:

The Competency Elements documented in this Guidance Note provide the basic criteria for a Station Incident Officer to carry out their role effectively.

To ensure that individuals selected for competency training in the role of Station Incident Officer are provided with the best opportunity to gain a comprehensive understanding of what is required from them and the roles they may be expected to interface with, the following guidance is provided on what consideration should be given on planning and delivering the training sessions:

<i>Consider for inclusion</i>	<i>Guidance on Delivery</i>
<i>Invite representatives of internal agencies to provide insight into their roles and responsibilities in the event of an accident or incident</i>	<i>Invited presenters could include:</i> - Experienced station incident officers - Rail Incident Officer - Train Operator Liaison Officer - Route Control Manager - British Transport Police - Rail Incident Care Team leads - Personnel with responsibility for the repair and maintenance of station infrastructure
<i>Invite representatives of external agencies to provide insight into their roles and responsibilities in the event of an accident or incident</i>	<i>Invited presenters could include:</i> - The local police, fire and ambulance services - The local authority - Rail Accident & Investigation Branch - Office of the Rail Regulator
<i>Include interactive role play</i>	<i>Provide opportunity for course participants to actively test communication, interface management and decision-making skills:</i> - Use credible desk top style scenarios with participants taking turns in playing the role of the Station Incident Officer – use other participants to act out interfacing roles - If possible, make use of invited presenters (see above) in simulated roles they would normally take in the event of an incident - Encourage log keeping of communications made and actions taken - Encourage informed decision making based on the facts presented to them - Consider putting participants under simulated pressure, especially when making decisions - Encourage impartial feedback from other participants on how they think the participant undertaking the role of the Station Incident Officer has managed the scenario <i>Use role play to help with the development of interpersonal skills such as assertiveness which are crucial to effectively carrying out the role of Station Incident Officer</i>
<i>The use of station layout diagrams, maps of the local area or other 'props' such as models</i>	<i>Props can successfully be used as a visual aid during both training and exercises to enhance scenario appreciation and understanding</i> <i>Model railway layouts can be utilised to provide a 'picture' of the incident scene.</i>

<i>The use of DVD and/or CCTV footage of real events that a Station Incident Officer may have to manage</i>	<i>It is common practice for training organisations to use film footage of real events to emphasise the potential for occurrence and the possible consequences if ineffectively managed.</i> <i>Trainers or presenters must be considerate of both the audience and the content when deciding on what is to be shown. Using such footage to demonstrate the potential consequences may in some cases cause upset and anxiety so discretion must be used.</i>
<i>Use of Mnemonic METHANE</i>	<i>Explanation of using the mnemonic METHANE as an aid when responding to a Major Incident.</i> <i>The METHANE mnemonic stands for:</i> M – Major Incident Declared E – Exact Location T – Type of Incident H – Hazards present A – Access and egress N – Number of casualties E – Emergency services on scene/required
<i>Use of the JESIP Joint Decision Model (JDM)</i>	<i>Work through the scenario and how the JDM would apply and help with structured decision making</i>  <pre> graph TD A[Gather information and intelligence] --> B[Assess threats and risks and develop a working strategy] B --> C[Consider powers, policies and procedures] C --> D[Identify options and contingencies] D --> E[Take action and review what happened] E --> A A <--> B B <--> C C <--> D D <--> E E <--> A F((Working together saving lives reducing harm)) A <--> F B <--> F C <--> F D <--> F E <--> F </pre>

Rail Delivery Group
